Investment objective

The Fund's primary objective is to seek to achieve a high rate of return relative to typical high yield investments by investing primarily in a portfolio of short-term, lower volatility, high yield debt with an average duration of approximately 12-24 months. The Fund will invest in a diversified portfolio of typically below investment grade high yield securities, including global corporate bonds, bank debt, convertible bonds, commercial paper and preferred stocks.

Fund grading

4 Star Overall Morningstar Rating™ as of 31 July 2024

Jeffrey Stroll and David D. Kim + rated - Citywire Fund Manager Ratings

Important note

- Post Short Duration High Yield Fund (the "Fund") invests primarily (i.e. at least 70% of its net asset value ("NAV")) in a portfolio of global short-term, high yield corporate debt securities with an average duration of approximately 12-24 months. These securities will generally be rated below investment grade as rated by internationally recognised credit rating agencies e.g. Standard & Poor's, Moody's, and Fitch or are unrated.
- Investment involves risk. There is no assurance on investment returns and you may not get back the amount originally invested.
- The investment decision is yours but you should not invest in this Fund unless the intermediary who sells it to you has advised you that it is suitable for you and explained how it is consistent with your investment objectives.
- You should not invest solely in reliance on this marketing material alone. You should read the Summary Prospectus and the relevant Supplement(s) before investing including the Special Investment Considerations and Risks section of the Summary Prospectus.
- In relation to D2 Class Income Plus Units of the Fund, the dividends which may be distributed by such class of units may be paid effectively out of the capital of the Fund (i.e. making the distribution from gross income while charging all or part of the Fund's fees and expenses to capital), resulting in an increase in distributable income for the payment of dividends by the Fund and an immediate reduction of the net asset value per unit of the Fund. Payment of dividends effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Dividend is not guaranteed.

Performance note

From December 2018, the performance data shown is based upon the Fund's official Net Asset Value (NAV) prices. The performance data shown is net of fees and other charges but excludes any potential entry/exit charges- as such the return an investor receives may be lower. Prior to 31st December 2018, the data performance calculations reflect the month-end market close prices of the Fund's assets. After 1 January 2019, the performance data shown is based upon the Fund's Net Asset Value (NAV) prices of the last Irish business day of the month. For Funds not open for dealing on this day this will be an indicative NAV. As a result, it is possible that the stated performance and the actual investment returns available to investors will differ. The performance information reflects performance of the D2 Class income units. Periods over one year are annualised. Investors should obtain their own independent tax advice. Up until 30th June 2023, the Fund was actively managed with reference to the Bloomberg US Government 1-2 Year Index. With effect from 1st July 2023 the Fund is actively managed with reference to the ICE US Treasury 1-3 Year Bond Index. The outperformance of either index is not specifically included in the Objective of the Fund and the figures shown in the table are provided as a comparison only. The two methods of calculation of performance may not be identical. Investments do not always add up to 100% due to rounding. Past performance is no guarantee of future results. All figures shown in this document are in HKD unless otherwise noted. **Current Yield is the annual interest earned on the underlying bonds divided by the market price of the underlying portfolio of bonds. The figure is not the dividend yield received by the investors and is subject to change depending on the underlying portfolio of bonds. ***Yield to Worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making the worst-case scenario assumptions on the issue. #Yield to Maturity is a concept used to determine the rate of return an investor will receive if a long-term, interest-bearing investment, such as a bond, is held to its maturity date. Please note that this is not the return or dividend to be received by investors in the fund. In prior fact sheets, the yield to worst calculation has been presented as yield to call, this reference has now been revised. Overall Morningstar Rating™ as of July 2024. Morningstar, Inc. Disclosure

*Where applicable: In Singapore, the Fund is registered as a Restricted Scheme and in Italy for Qualified Investors only. Divergences between the returns of unit classes denominated in the base currency of the fund and hedged unit classes may arise among other things due to interest rate differentials between the base currency of the fund and the hedged unit class currency.
